24700 Wood Court,
Macomb MI 48042

Description:

The IWT-CA gun is designed to automatically feed C.D. weld studs up to 1.125" (30mm) long. When used with IWT's UVF-14 universal feeder, operators can benefit from increased production rates as this system can load and weld up to 20 studs per minute (depending on stud diameter). Automatic feeding also diminishes the fatigue associated with manual loading of weld studs. The guns spring pressure can be quickly adjusted for different materials without the changing of spring or special tools. High quality hose jacket protected cables and airlines against rough surfaces. Equipped in an impacted resistant housing and self-lubricating bearing, this gun will hold up to manufacturing's toughest demands.

Weld Range:

#6-1/4" (M3-M6, up to 30mm long)

Welding Process:

Capacitor Discharge, Contact

Welding Cables:

20ft of #2 highly flexible welding cable

Feed Rate:

Up to 20 studs per minute depending on fastener size

Total Weight:

2.6lbs without cables

FEATURES

- MADE IN USA
- Easy to Use
- Light Weight
- Heavy Duty Cables
- Adjustable Leg Set
- New Comfort Grip
